

# COVID-19 Therapeutics

Getting vaccinated is the best way to protect yourself against COVID-19. Infectious disease and health care experts agree: **take your shot as soon as you are able.**

## Treatment options for COVID-19 have come a long way since early 2020

For individuals infected with COVID-19, **there are increasing treatment options available with many more being tested for future use.**

The U.S. Food and Drug Administration created the **Coronavirus Treatment Acceleration Program - or CTAP** - to accelerate the development of therapeutics, which include antivirals, cell & gene therapies, immunomodulators, neutralizing antibodies and others.

### ✗ OLD WAY:
